Dear Mr. Hale

I strenuously object to the US participation in the current Codex Food labeling campaign. I feel that the US population has a right to know if the food they are buying has been produced using genetic engineering of any sort or contains bovine growth hormone. US Public has a right to know. We should have a choice & not have these decisions made for us behind closed doors.

I am especially concerned because there have been no long term studies proving (or disproving) the safety of both genetically engineered food and bovine growth hormone or the effect of such on humane health

c5605

We, the US public deserve full knowledge of the source & content of the food we eat. Please do not take that away from us.

Sincerely, Robert Reed
